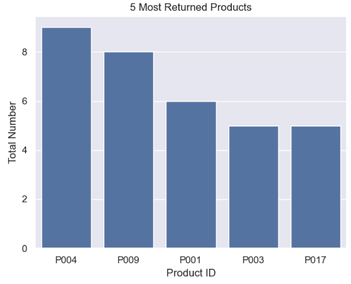
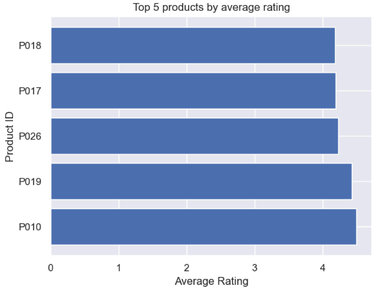
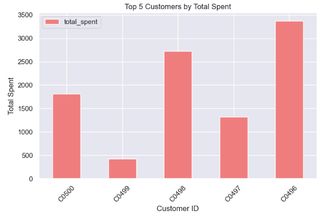
D2C Skincare E-Commerce Analysis Infographic



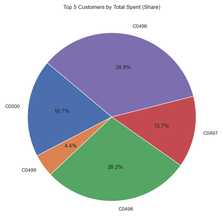
2% Salicylic Acid Face Serum (P004), Vitamin C 10% Face Serum (P009), Alpha Arbutin 2% Serum (P001), Ceramide Moisturizer (P003), Oat Extract Gentle Cleanser (P0017) are **5 most returned products**, which are **largely serums**.



Vitamin B5 Moisturizer (P010), Vitamin B5 Moisturizer, Vitamin B5 Moisturizer (P026), Vitamin B5 Moisturizer (P017), Vitamin B5 Moisturizer (P018) are the **5 highest average-rated products**, which are **all moisturizers**.

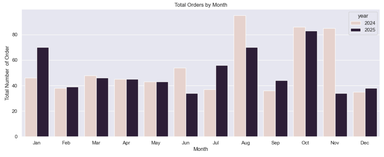


Customers Priya Reddy (C0067) and Rohan Verma (C0097) are the most frequent shoppers, each placing 8 orders but neither appears in the high-spenders list.



Meanwhile, Karan Reddy (C0496) dominates by revenue, accounting for nearly 35% of total spending among the top five.

This split reveals an important insight:
Order volume and order value don't always go hand-in-hand. A small group of high-value customers quietly drives a disproportionate share of revenue.

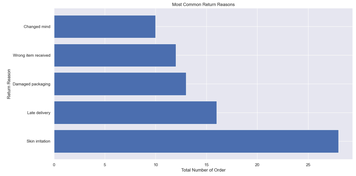


Order volume is remarkably seasonal.

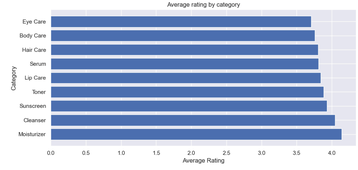
In 2024, the business had a dramatic spike in August (95 orders) followed by a October with 83.

January 2025 started the year unusually hot, with another spike in August and a strong October again.

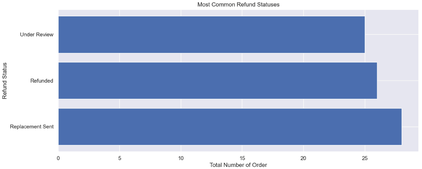
The summer months also signal potential for targeted promotions around skin-care awareness seasons.



The leading reason for returns is **skin irritation**.

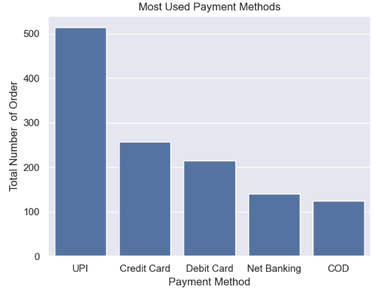


Moisturizer, averagely rated at 4.14/5, leads in rating by category.

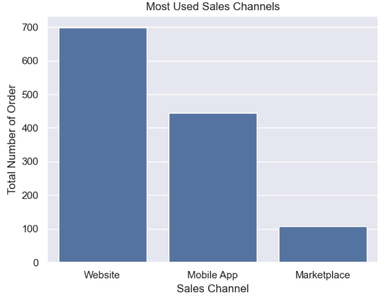


Refund resolutions are fairly evenly split between "Replacement Sent" (~28), "Refunded" (~26), and "Under Review" (~25).

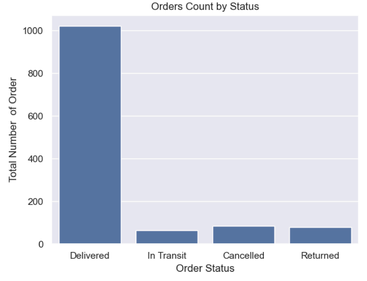
5-star reviews (193 reviews) leads in custom reviews, and dwarf both 1-star (28 reviews) and 2-star (39 reviews).



UPI dominates payment methods with 514 orders, which is more than double Credit Card at 257.



Regarding sales channel, the **Website** leads with 698 orders.



The overwhelming **majority of orders** (over 1,000) are **delivered successfully**.
